## ABOUT

Moritz Berg (b. 1994) lives and works in Stuttgart, Germany. His artistic practice is based on the study of perception and the aesthetic effects of a nature informed environment. Starting from common yet transient moments his artworks focus on the development of a visual vocabulary that reflects the fast pace of everyday life and points out hidden qualities in supposed trivia. Withal his paintings sound out the qualities of a symbiosis between man and nature by a spiritualization through abstraction, considering a union that merges specific features into an aesthetic of being together.
